Dell Pro Rugged 14

Meet the Dell Pro Rugged 14, the world's lightest, smallest 14" semi-rugged AI PC in the industry, designed for those who demand top-tier performance in harsh environments.

UNCOMPROMISED POWER AND PERFORMANCE

Powered by Intel® Core™ Ultra processors, this laptop delivers high-performance computing with built-in AI. Optional NVIDIA RTX 500 Ada Gen GfX graphics card makes it perfect for handling demanding applications in the field. Plus, with exceptional battery life, you can stay productive and connected longer.

ANYWHERE USABILITY

Designed for field usability with an optional bright 1100-nit screen that's viewable in direct sunlight. Hot-swappable batteries provide uninterrupted power for all-day productivity and options like 5G and Wi-Fi 7 ensure you stay connected wherever you are.

SECURE AND MANAGEABLE

Reduce the attack surface and improve cyber resilience with the world's most secure rugged PCs featuring unique built-in, BIOS-level security. Experience effortless management with the most manageable commercial PCs.

LIGHTWEIGHT AND RESILIENT

The small and lightweight Dell Pro Rugged 14 is drop-tested from 3-feet, temperature-tested from -20°F to 145°F and carries an IP-53 certification, ensuring it performs flawlessly in harsh environments. Enhanced cold boot capabilities allow the laptop to start up reliably even in freezing temperatures as low as -20°C.

FedData Custom Tactical Kits

Custom-Engineered Protection. Built for Any Mission.

FedData Custom Tactical Kits deliver rugged, field-ready transport solutions engineered to protect equipment of any size, from handheld devices to full tactical rack systems. Each kit is built inside a premium protective enclosure, including Pelican, SKB, and Shell Case, and fitted with precision-cut custom foam that locks every item into place with absolute accuracy. Designed for field operations, sustainment teams, technical groups, and mission units, FedData Custom Tactical Kits provide unmatched durability, organization, and deployment speed in any environment.

UNBEATABLE PROTECTION

FedData builds Custom Tactical Kits using deployment-grade hard cases paired with CNC-cut custom foam engineered to protect against shock, vibration, dust, water, and extreme temperatures. Every cavity is designed around your exact equipment, ensuring each component is fully supported and mission-ready no matter the conditions. From delicate instruments to heavy, high-value systems, FedData Custom Tactical Kits keep your gear operational and ready for immediate use.

ACCESSIBLE ANYWHERE

Designed for field environments, Custom Tactical Kits provide structured layouts, rapid access, and clear organization during real missions. Multi-layer foam designs allow users to access tools, devices, or components quickly, while the rugged outer cases withstand transport by vehicle, aircraft, or maritime platforms. Whether your mission requires a handheld device kit or a multi-case equipment set, every Custom Tactical Kit is built for dependable field usability.

SAFE AND ACCOUNTABLE

Custom cavity layouts create a visual map of your entire loadout, enabling fast accountability checks. Missing items are instantly visible. Case locking points and rugged seals protect equipment during transport and storage, while foam density selection ensures sensitive gear remains secure. FedData Custom Tactical Kits support controlled equipment storage, unit-level accountability, and repeatable configurations across teams and programs.

DURABLE AND LIGHTWEIGHT

FedData Custom Tactical Kits use proven, high-performance protective cases engineered for durability without unnecessary weight. These cases are dustproof, waterproof, crush-resistant, and pressure-regulated for air travel. Combined with precision-cut foam interiors, they provide long-term protection for everything from phones and tablets to sensors, optics, power equipment, technical tools, or full tactical server racks.
