END-TO-END SUPPORT

- ▶ Warehouse space at little to no additional cost to support just-in-time delivery.
- ▶ Financial relationships that allow significant advance purchases to anticipate needs or facilitate just-in-time delivery.
- ▶ Staff with appropriate OEM certifications and clearances to specify, support, and meet customer requirements that OEMs often cannot supply themselves.
- ▶ Ability to bundle hardware and services to allow a managed services capability, which can help Federal clients address appropriation issues.
- ▶ Dedicated lab space for clients to test and evaluate products.
- ▶ Dedicated training spaces available to our clients.

ADDITIONAL INTEGRATION OFFERINGS

- ▶ Asset tagging
- ▶ Unique Identification (UID) and asset reporting
- ▶ Image loading and a full range of component level integration
- ▶ Full testing and burn-in
- ▶ Packaging, labeling, and shipping (to include palletized and containerized)
- ▶ Rack and stack, and testing of components and racks
- ▶ Warranty support and break/fix support, to include stocking spares that can be used to meet time critical customer replacement and break/fix support requirements

What Is ITES-4H?

ITES-4H is the Army's primary contract for buying commercial IT hardware quickly, securely, and with full compliance. It gives Army, DoD, and Federal agencies a streamlined path to acquire servers, storage, networking, end-user devices, peripherals, imaging equipment, and related accessories through the CHES Digital Marketplace.

U.S. Army ITES-4H
Contract Vehicle

Contract Number:
W519TC-25-D-A047

Why FedData?

FedData has been awarded the Army CHES ITES-4H contract as a Small Business Prime Contractor, supporting Army programs with modern IT hardware, lifecycle sustainment, and mission-ready solutions for the Warfighter.

FedData brings:

Mission-Focused IT Hardware Expertise

Deep experience across all ITES-4H hardware categories: servers, storage, networking, end-user devices, peripherals, and video/imaging systems.

Secure and Reliable Supply Chain

Trusted, U.S.-based supply chain with secure handling, validated configurations, asset tagging, imaging, and deployment-ready deliveries for CONUS and OCONUS missions.

Fast, Accurate, ITES-Compliant Quoting

Our dedicated quoting team provides rapid turnaround and validation to ensure every configuration is compliant with TAA, Energy Star, EPEAT, and Army purchasing policies.

Integrated Support Throughout the IT Lifecycle

FedData provides end-to-end support around hardware delivery including kitting, staging, configuration services, warranty coordination, and post-delivery assistance.

Why Small Business Set-Aside Matters

ITES-4H allows customers to set aside RFQs exclusively for Small Business Primes like FedData. Why is this critical to the Army?

Many programs overlook Small Business Set-Aside simply because they assume small businesses lack scale or capacity. FedData removes that concern entirely. As an ITES-4H Small Business Prime, FedData brings the depth of a major integrator while delivering the speed, attention, and customer focus that large contractors often cannot match. Programs get the best of both worlds: full capability with none of the bureaucracy.

Choosing a Small Business on ITES-4H also has direct benefits:

- ▶ It strengthens Army and DoD Small Business goals
- ▶ It improves competition
- ▶ It shortens acquisition timelines
- ▶ It gives programs a dedicated team that treats every requirement like it directly impacts the mission

You are not "sending an RFQ to a small company," you are partnering with a high-capability federal integrator that prioritizes your success!

When customers use Small Business Set-Aside on ITES-4H, they gain a true mission partner and help sustain a critical part of the Army's industrial base. FedData delivers the responsiveness, expertise, and accountability that programs expect, with enterprise-level reach into OEMs and logistics networks that ensure reliability at scale. Customers will get white-glove, concierge treatment from FedData to assist in shaping your requirements properly within CHES.

FedData ITES-4H Customer Site

FedData provides a dedicated ITES-4H support page where customers can quickly access everything they need to order and manage hardware through the contract. The site includes the official ordering guide, our full catalog, key contract information, support contacts, and helpful tools such as FAQs and customer feedback options. It is designed to give Army and Federal buyers one clear place to find answers and move their requirements forward efficiently.

24/7 ITES-4H Support: Army@FedData.com | 855-592-8794

For order status, warranty coordination, delivery issues, or technical support.

Deep Reach Into OEMs for Best Pricing and Support

FedData maintains strong federal-focused relationships with leading OEMs.

This gives customers:

- ▶ Better pricing and discount access
- ▶ Priority on lead-time and backorder escalations
- ▶ Direct engineering validation for configurations
- ▶ Faster issue resolution during warranty or post-delivery
- ▶ Early visibility into product lifecycle and transitions

This OEM reach enables FedData to deliver higher value, faster turnarounds, and superior support compared to non-aligned contractors.

FedData gives you fast, compliant, mission-ready IT hardware with a dedicated team that supports you from requirement to delivery without friction. If you want reliable execution, strong OEM backing, and a Small Business Prime that treats every order like it impacts the Warfighter, FedData is the clear choice.
